

Management systems for large companies

About us

Sergiy Litvinenko Founder of the company LITIKO

LITIKO team helps companies to optimize business processes for 25 years

We provide services for the development, configuration, and implementation of automated business solutions tailored to the requirements of Ukrainian businesses and national legislation.

We take responsibility for each project and before every client.

Implementation of the process model management (Business Process Management - BPM)

Project duration

from 2 months

Payback

6-12 months

Why it's useful:

Helps implement the company's strategy through the construction, monitoring, and continuous development of business processes

Assists in setting up the order of operations to achieve a stable and high-quality result

Automates end-to-end and cross-system processes

Assists in measuring, collecting, and visualizing key performance indicators (KPIs)

Builds clear interaction at all levels of the business, develops internal and external services of the company

Implementation of electronic document management (Enterprise Content Management - ECM)

Project duration

from 2 months

Payback

6-12 months

Why it's useful:

Electronic documents and tasks are automatically transmitted through built-in business processes, increasing the speed of company operations

Risks of document loss and leakage of confidential information are reduced

TOP and Middle managers save 5-10% of their time

The office becomes paperless, and you spend significantly less money on paper, printers, cartridges, document shipping, and storage

Productivity increases by 25%. The system records KPIs and monitors work, practically eliminating the human factor

01

As an integrator company, we recommend only carefully selected systems and solutions that have been repeatedly tested by customers.

02

We've been in the automation business for 25 years and have successfully implemented over 250 projects. We will share with you practices that work and warn you against making mistakes.

03

We offer a set of ready-made solutions that will reduce up to 50% of your budget and time.

04

Our experts are always in touch - a dedicated technical support service will solve your questions and provide methodological support.

05

Fixed project cost and timeframe allow you to plan your activities and be and be confident in the result.

Why successful companies choose LITIKO?

**Cooperating with us
you get more**

Increase the competitiveness and the value of your company

Implementing modern approaches to organizing work, fostering collective collaboration, enhancing operational efficiency, and improving company manageability. Reducing decision-making time and increasing labor productivity by 25% or more.

Continuous support and maintenance

You will never be alone. We support you at every stage: help you choose the system, implement it on time, train users and administrators, ensure smooth operation, and provide consultations through hotlines.

Financial benefits

Our products are significantly more affordable than Western counterparts with comparable functionality. Ready-made solutions and competitive licenses reduce budgets by up to 50%. We fix the project budget in the contract.

Guarantee of successful completion of the project

We enter into a contract, outlining the step-by-step procedure, assigning the project team, and providing financial guarantees. The developed implementation methodology allows us to execute projects on time, mitigating risks.

Ability to work with the system from anywhere in the world

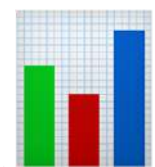

Employees can work outside the office using browsers, mobile applications, and chatbots in messengers.

Platform for business development

Our management programs support the development of your company through the possibilities of phased implementation, expanding the scope, and scaling of application.

As an Integrator, we have studied more than 50 systems and selected

Systems that give the best results

M-Files

ECM DMS

M-Files is an intelligent information management platform that organizes content based on what it is, rather than where it is stored. Integrate M-Files with your business applications and external systems using ready-made connectors to popular systems or APIs for custom integration.

Creatio

No-Code. BPM. CRM

NO-CODE platform for automating work processes and CRM with maximum freedom.

 **scriptum**

ECM. BPM

A set of modules for automating and enhancing the efficiency of various processes, regardless of their complexity level and project scale. Connect Scriptum.Repository to professionally and conveniently organize document storage and electronic databases.

Almexoft

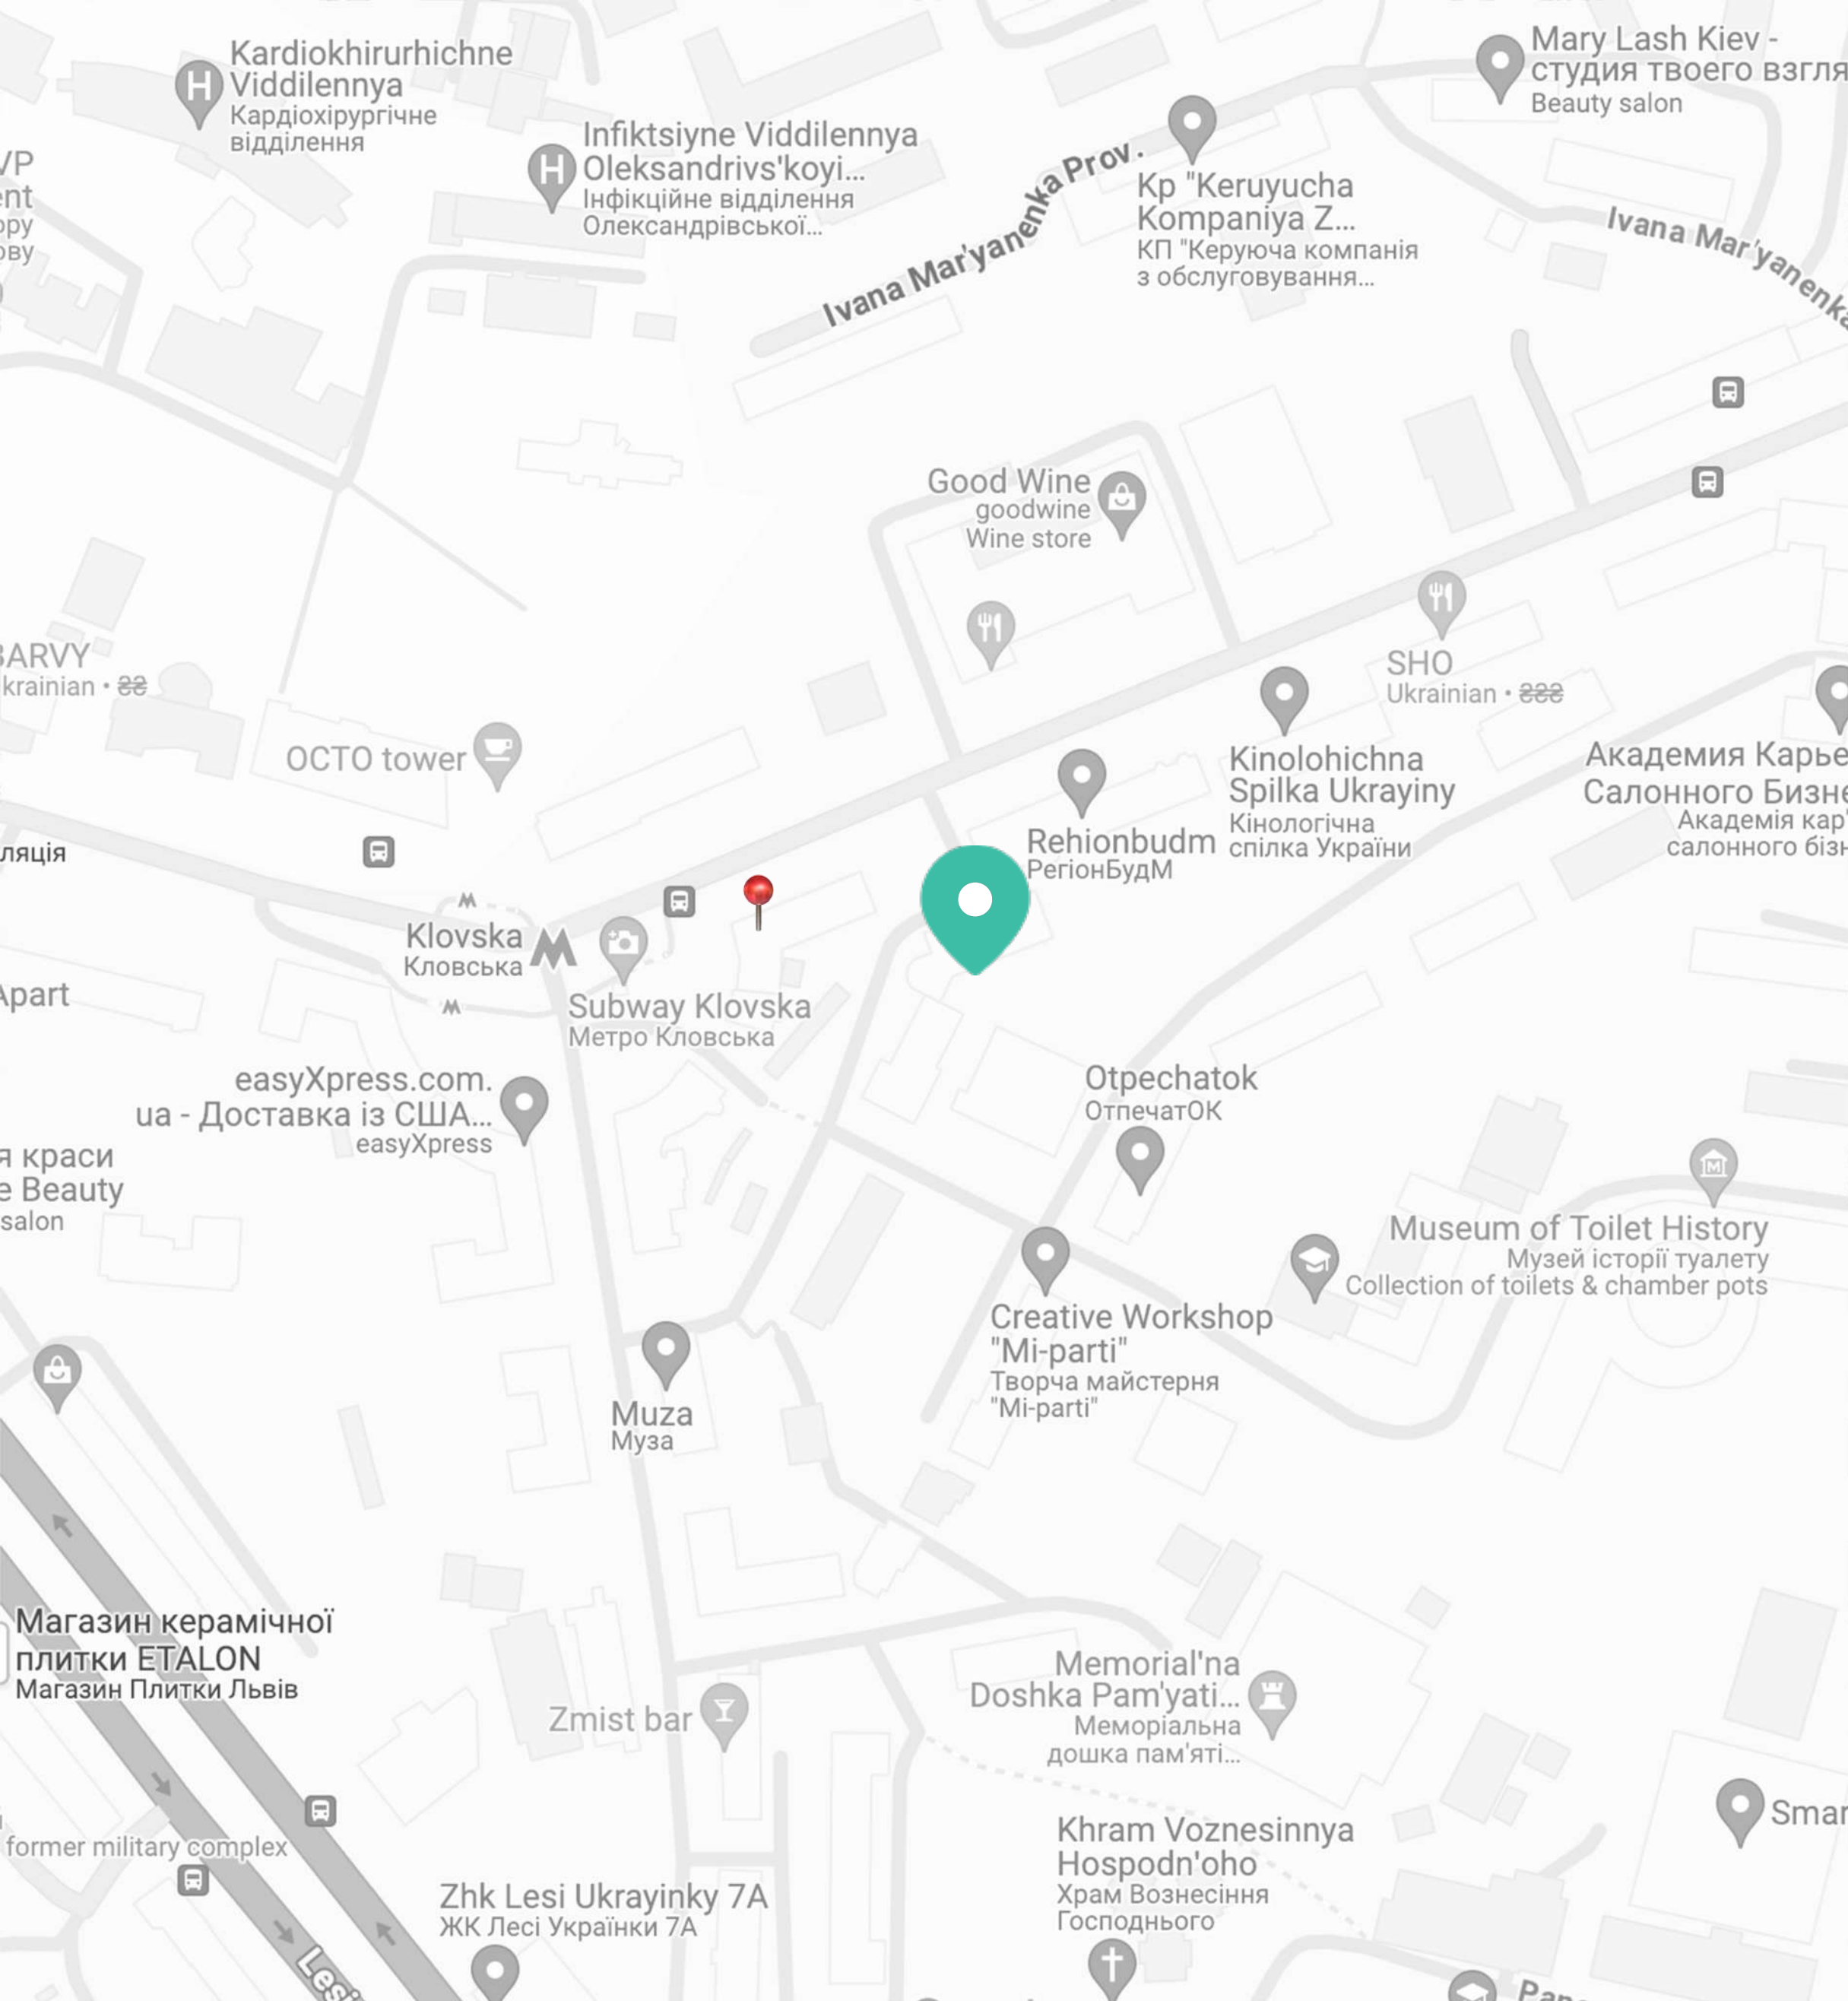

BPM

Low-code platform for automating business processes and electronic document management.
