# Implementation of the process model of management

## (Business Process Management - BPM)

Project Duration

**from 2 months**

Project payback

**period 6-12 months**

## How it's useful:

Helps to implement the company's strategy through the construction, control and continuous development of business processes

Helps to set up the order of operations to achieve a stable and high-quality result

Automates end-to-end and cross-system processes

Helps measure, collect and visualize performance indicators (KPI)

Builds clear interaction at all levels of business, develops internal and external services of the company

# Implementation of e-document flow

## (Enterprise Content Management - ECM)

Project duration

**from 2 months**

Project payback

**6-12 months**

## How it's useful:

Electronic documents and tasks are automatically transferred through built-in business processes, increasing the working speed of the company

Reduce the risks of document loss and loss of confidential information

TORs and Middle managers save 5-10% of their time

The office goes paperless, and you spend significantly less money on paper, printers, cartridges, shipping and document storage

Productivity increases by 25%. The system captures KPIs and monitors work, virtually eliminating human factors

01

As an integrator company, we only recommend carefully selected systems and solutions that have been repeatedly tested by customers.

02

We have been working in the field of automation for 25 years and have successfully implemented more than 250 projects. We will share with you practices that work and warn you against mistakes.

03

We offer a suite of ready-made solutions that can save you up to 50% of your budget and time.

04

Our experts are always on touch. A dedicated technical support team will solve your questions and provide methodological support

05

The transparent cost per hour and clear deadlines allow you to plan your activities and be confident in the result.

# Why do successful companies choose THE LITIKO?

**Working with us  
you get more**

## Increasing the competitiveness and value of your company

Introduction of modern approaches to work organization, stimulating collective cooperation, increasing operational efficiency and improving the company's manageability. Reduce decision-making time and increase work productivity by 25% or more.

## Continuous support and maintenance

You will never be left alone. We support you at all stages: we will help you choose a system, implement it in time, train users and administrators, ensure smooth operation and hotline consultations.

## Financial benefit

Our products are an average of an order of magnitude lower in cost than their foreign analogues with comparable functionality. And ready-made solutions and competitive licenses reduce budgets by up to 50%. We fix the cost per hour of project work in the contract.

## Guarantee of successful project completion

We conclude a contract, in which we prescribe the procedure of stage-by-stage work, assign a project team, and provide financial guarantees. The developed implementation methodology allows us to implement projects on time, levelling the risks.

## Ability to work with the system from anywhere

Employees can work outside the office through browsers, mobile apps and messenger chatbots.

## Business development platform

Our management programs will support your company's growth through phased commissioning capabilities, expanding the scope and scale of application.

As an integrator, we have investigated over 50 systems and selected

## The systems that produce the best results

### ECM. BPM

A set of modules for automating and improving the efficiency of various processes, regardless of their complexity and project scale.

Connect Scriptum to professionally and conveniently organize the storage of documents and electronic databases.

### ECM. DMS.

M-Files is an intelligent information management platform that organizes content based on what it is, not where it is saved. Integrate M-Files with business applications and external systems using out-of-the-box connectors to popular systems or APIs for customized integration.

### Electronic Archive

A digital archive for business is a powerful protection of documents from cyber threats, an opportunity to optimize the process of working with important information, with a knowledge base, standardized templates of company documents that immediately get into the electronic register.

### No-Code. BPM. CRM

NO-CODE platform for workflow automation and CRM with maximum freedom.

### DMS

A ready-made solution for HR document flow automation that reduces the load on HR department, combines all processes in one solution: from application submission to electronic signing with integration with popular electronic document signing systems.

# Implemented projects

# Implementing complex IT solutions

What kind of problems  
clients come to us  
with?

(Figures for 2025)

Unnecessary costs

## The most popular:

### Lack of a unified system

Customers complain of chaotic document storage, manual data entry, difficult searches and loss of important files

### Long and complex document approval processes

Approval of documents is manual, time-consuming, and causes delays.

### There is no cost control and no transparent budget planning

Companies are challenged with uncontrollable costs, unpredictable growth in the cost of IT services.

### Problems with staff training and implementation of new IT solutions

Users are slow to adapt to new systems, resistant to change.

### No integration between systems

Data has to be transferred manually, which entails errors and wasted time.

What kind of problems  
clients come to us  
with?

(Figures for 2025)

Unnecessary costs

## The most popular:

### Problems with scaling and performance of IT solutions

IT infrastructure can't keep up with the company's growth, and overloads occur.

### Slow response to customer requests and incidents

Customer issues are resolved slowly, technical support is delayed.

### Lack of mobile apps for clients and employees

Customers expect mobile access to services, but it's not there.

### No predictability in selecting and migrating to new IT solutions

Companies do not have a clear strategy for migrating from out-of-date systems.

### Problems with compliance of IT solutions with legislative norms

Constant changes in legislation require rapid adaptation of systems.

## Why choose LITIKO

LITIKO is not just an IT integrator, but a strategic partner that helps businesses work more efficiently, save time and money, reduce bureaucracy and improve process control.

Project implementation timeline

**From 5 days  
to 12 months**

## How we can help:

Complex IT solutions on a turnkey basis

Automation without unnecessary complications

Deep integration with existing systems

Transparent pricing and predictable costs

Accessibility from anywhere in the world

High level of security and legal compliance

Rapid project implementation and adaptation to business needs

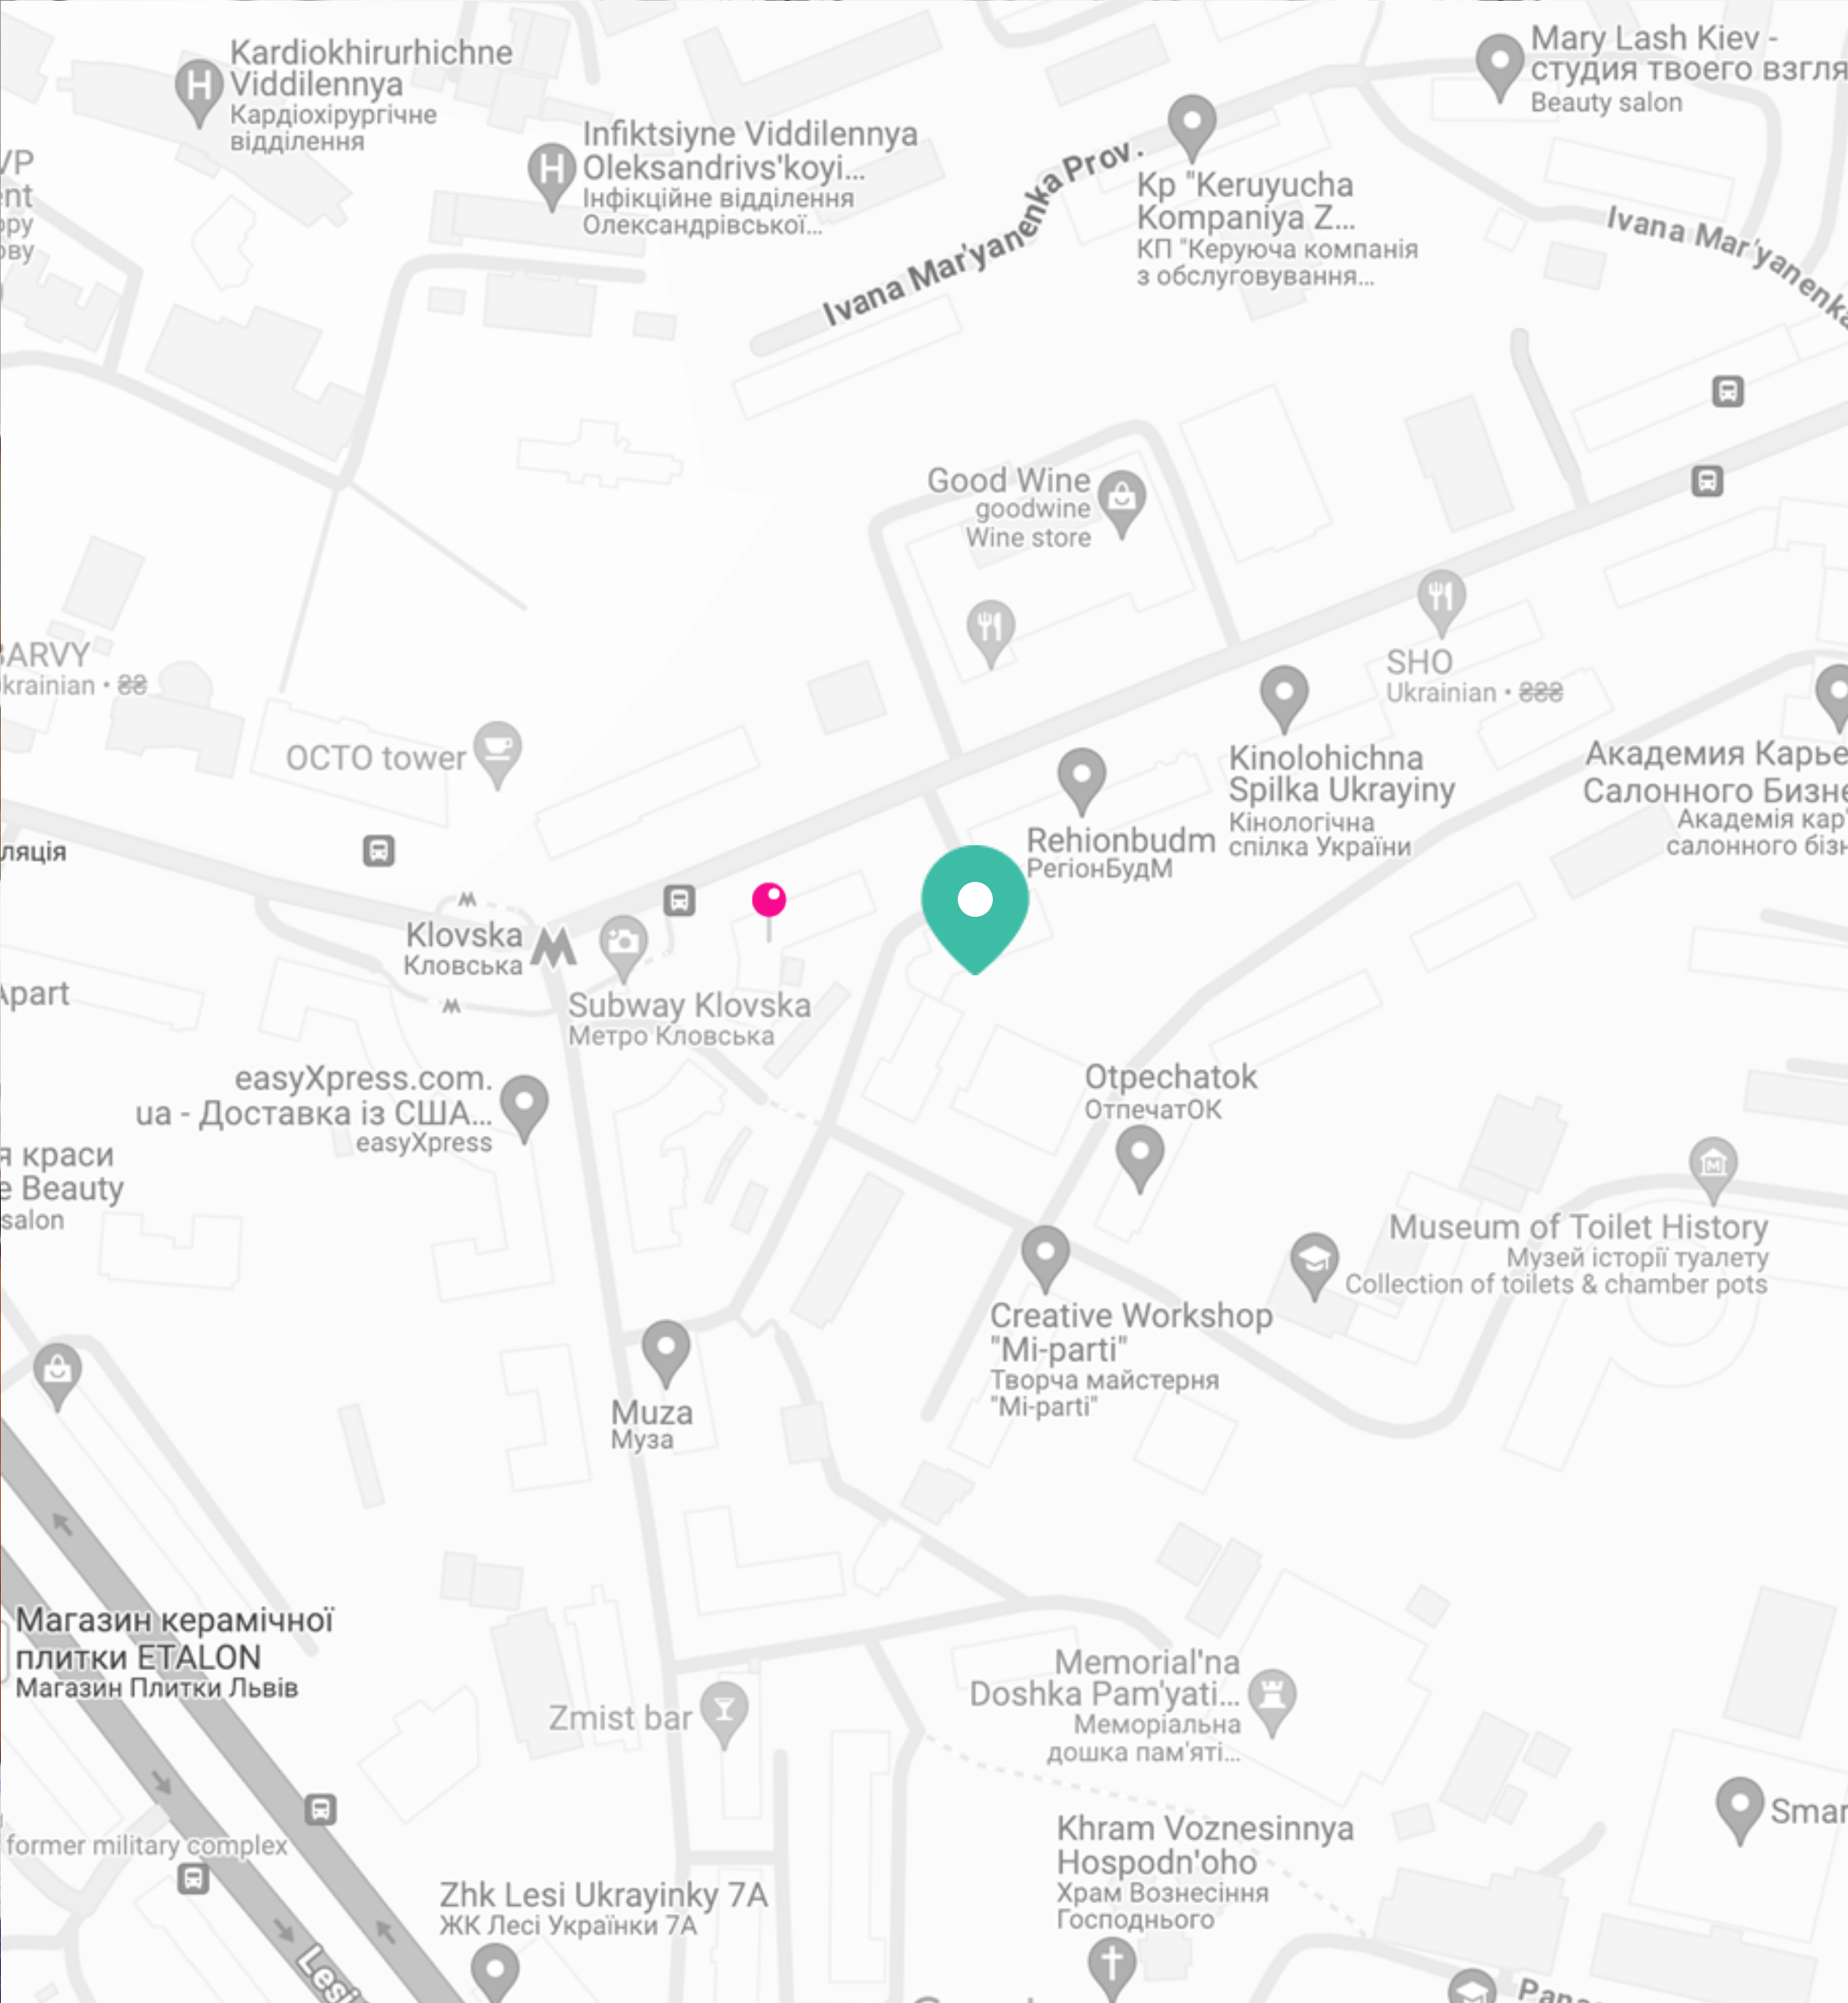

Training and support at every stage

On-going technical support and updates

Experience of working with large international and Ukrainian companies
